Henry, a threat intelligence analyst at ABC Inc., is working on a threat intelligence program. He was assigned to work on establishing criteria for prioritization of intelligence needs and requirements.

Which of the following considerations must be employed by Henry to prioritize intelligence requirements?

- **A.** Understand frequency and impact of a threat
- **B.** Understand data reliability
- **C.** Develop a collection plan
- **D.** Produce actionable data

Answer: A

Question No. 2

In which of the following attacks does the attacker exploit vulnerabilities in a computer application before the software developer can release a patch for them?

- **A.** Active online attack
- **B.** Zero-day attack
- **C.** Distributed network attack
- **D.** Advanced persistent attack

Answer: B

Question No. 3

H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.

Which of the following is the most cost-effective methods the organization can employ?

- **A.** Recruit the right talent
- **B.** Look for an individual within the organization
- **C.** Recruit data management solution provider
- **D.** Recruit managed security service providers (MSSP)

Answer: D

Question No. 4

An analyst is conducting threat intelligence analysis in a client organization, and during the information gathering process, he gathered information from the publicly available sources and analyzed to obtain a rich useful form of intelligence. The information source that he used is primarily used for national security, law enforcement, and for collecting intelligence required for business or strategic decision making.

Which of the following sources of intelligence did the analyst use to collect information?

- **A.** OPSEC
- **B.** ISAC

- C. OSINT
- D. SIGINT

Answer: C

Question No. 5

Walter and Sons Company has faced major cyber attacks and lost confidential data

a. The company has decided to concentrate more on the security rather than other resources. Therefore, they hired Alice, a threat analyst, to perform data analysis. Alice was asked to perform qualitative data analysis to extract useful information from collected bulk data.

Which of the following techniques will help Alice to perform qualitative data analysis?

- A. Regression analysis, variance analysis, and so on
- B. Numerical calculations, statistical modeling, measurement, research, and so on.
- C. Brainstorming, interviewing, SWOT analysis, Delphi technique, and so on
- D. Finding links between data and discover threat-related information

Answer: C
